Sub: Priority of Vaccination for teachers and their family reg

I may be allowed to mention the following points for your kind consideration.

It's really unfortunate and disastrous to witness that more than 65 teachers of numerous Kendriya Vidyalayas have already succumbed to the pandemic covid-19 and a substantial number of others are severely affected and undergoing treatment for it. As per the experts, mass vaccination is the only way to eradicate this pandemic, and as per Govt. guidelines, all the individuals above 18 years of age are eligible for vaccination. Thus, it has become necessary for all the teachers and their family to get vaccinated so that gradually we can get rid of the Pandemic. Despite the technological advancement, in the teaching learning process, oral communication is still the leading tool. Studies and experiences show that the post COVID effects can last for months and it may impair the oral communication for a long time. As a result, it may affect the teaching learning process online as well as offline. Immediately after Summer Vacation, the teachers are in urgent need to interact with the students and their parents. In addition to this, many external examinations are scheduled for the coming months and many Kendriya Vidyalayas are centres of such examinations.

In this context I request your good office to kindly explore the possibility of arranging **prioritized vaccination** facility against the pandemic Covid-19 for the staff of Kendriya Vidyalayas in consultation with the Health Department or any other competent authorities at Regional /National level.

Thanking you,

Yours faithfully

Mr. Gangadhar Mandal
Assistant General Secretary
